

BRUCEFO helps you launch or improve your products. Our experts will advise and assist you, from the identification of the problem to the publication and interpretation of the results. In addition, they will make recommendations to ensure optimum follow-up.

BRUCEFO:

- helps you with the labelling of your food products;
- advises on the shelf life of products and the use of additives;
- Guides you based on your customers' reactions and helps you to offer them a product that meets their expectations;
- also works together with various partners in order to provide you with the best possible guidance.

Subsidies

The uniqueness of our lab is that – in addition to the analyses themselves – we can also inform you about all the other subsidies from the Brussels-Capital Region to which your business may be entitled. We will be happy to examine it with you during a personal appointment.

Extra info

BRUCEFO occasionally organises information sessions, training or seminars for the Brussels food sector in collaboration with various partners.

- Watch the registration video of the online seminar (in French) in collaboration with [RABAD](#) on: [*How to determine a correct label and "best-before date" for food products before bringing them to the market \(18-01-2023\)*](#)
